

HSK 5 Vocabulary List

All 1300 words this level adds — in frequency order, with pinyin, traditional forms and native notes. From purrlearn.com

1300	2500	25
words listed	cumulative total	multi-reading characters

Why this order. These words are sorted by how often they actually appear, not alphabetically by pinyin. Studying top-down pays off immediately: the first few dozen entries carry a large share of everything you will read and hear at this level. Every word on this list also has native audio on the web version.

Which HSK is this? This list is the **2012 standard** (HSK 2.0): six levels, 150 / 300 / 600 / 1200 / 2500 / 5000 words cumulatively — still what most textbooks, apps and prep material use. The 2021 standard (HSK 3.0) restructures the system into three stages and nine levels and raises the counts sharply; its Level 1 alone is 500 words. The two are not interchangeable — check which one your test provider specifies.
